

## Stereo Editor v1.0

*Stereo Editor v1.0* is a featured-packed, public-domain composing system for *Enhanced Sidplayer* tunes on your Commodore 64 or 128 (in 64 mode). *Stereo Editor* builds on the powerful yet easy-to-use functions of the commercial *Enhanced Sidplayer* editor to create an integrated SID editing environment with many unique features, including:

- **Stereo editing and playback:** See up to six voices of music onscreen simultaneously for editing and playback! (Second SID chip or *SID Symphony Stereo Cartridge* required for six-voice playback.)
- **Full *Enhanced Sidplayer* compatibility:** Use any *Enhanced Sidplayer* commands to create your music. You can also edit any tune created with the *Enhanced Sidplayer* editor.
- **Real-time display:** Choose between watching command parameters or notes change in real time as a tune plays.
- **MIDI support:** Enter notes as well as play back tunes on any MIDI-compatible synthesizer. (Commodore-compatible MIDI interface required.)
- **Title editor:** Add a colorful title box to your compositions with the integrated SID title editor. You can even play the tune while editing its title!
- **Words editor:** Create sing-a-long SIDs with the integrated words editor. It's like using a colorful word processor!
- **Archive maker:** Archive your tunes and words for easier and more efficient exchange with other SID enthusiasts (MSW/SLR/SAL formats).

Although *Stereo Editor* is in the public domain, to use it you must own a copy of the commercial book/disk combo *Compute!'s Music System for the Commodore 128 & 64: The Enhanced Sidplayer*, by Craig Chamberlain. *Stereo Editor* depends on a file from the *Enhanced Sidplayer* disk to function. Also, the *Stereo Editor* documentation does not cover the *Enhanced Sidplayer* command set or music theory, both of which the book does in detail.

You can obtain *Stereo Editor* from many sources, such as bulletin boards, user groups, and national online information systems including Quantum Link. Dr. Evil Laboratories distributes *Stereo Editor* on a 1541-format disk for \$5.00 (U.S. funds only; WA residents add 8.1% sales tax). However, if you purchase the *Enhanced Sidplayer* book from us, *Stereo Editor* is only \$1.00 because shipping and handling is covered by the *Enhanced Sidplayer* book price. All orders should be made payable to Dr. Evil Laboratories and sent to:

Dr. Evil Laboratories  
P.O. Box 3432  
Redmond, WA 98073-3432

(Please allow 3-4 weeks for delivery.)
