

## The *SID Symphony Stereo Cartridge*

Enjoy stereo *Sidplayer* music conveniently and affordably with the *SID Symphony Stereo Cartridge* from Dr. Evil Laboratories! This cartridge provides you with three more SID voices and true stereo sound capability. There is no assembly required—simply plug the cartridge into your Commodore 64, 64C, SX-64, 128, or 128D and prepare yourself for breathtaking 6-voice stereo symphonies!

Many stereo *Sidplayer* songs, both standard and enhanced, are already available in the public domain, as is the player program for stereo SIDs, Mark A. Dickenson's *Stereo Player v10*. You can even create your own stereo *Sidplayer* songs with the public domain *Stereo Editor*. **Note:** You must own a copy of *Compute!'s Music System for the Commodore 128 and 64: The Enhanced Sidplayer* in order to use *Stereo Editor*. Both editors are available from Dr. Evil Laboratories.

The cartridge has recently been completely redesigned so that it no longer needs a 9-volt battery to operate. All necessary power is drawn directly from your computer's cartridge port! The only extra items you will need are two RCA male-to-male cables to connect the outputs of your computer and cartridge to your stereo system.

The *SID Symphony Stereo Cartridge* is still priced at only \$34.95 postpaid, making stereo music affordable for all Commodore computer owners. Plus, the cartridge is backed by Dr. Evil Laboratories' limited 90-day warranty.

**Note:** Also available is a disk with the latest version of *Stereo Player* and 39 stereo songs for \$1.00 as a service for those who do not have access to SID music libraries. This disk is not part of the standard \$34.95 cartridge package.

---

Please send me \_\_\_\_\_ *SID Symphony Stereo Cartridges* at \$34.95 each postage paid.

\_\_\_\_\_ Please include the *Stereo SID Music Collection* disk (\$1.00).
