

# The Enhanced Sidplayer

The original *Sidplayer* music system was published in Compute!'s *All About the Commodore 64: Volume Two* in 1984. Since then, *Sidplayer* has become the most popular music system for the Commodore 64 and 128 computers. In fact, half of Quantum Link's file space is taken up by *Sidplayer* files. *Sidplayer* has been so widely accepted that *Sidplayer* songs are now generically referred to as "SID songs".

In response to the success of *Sidplayer*, a new enhanced version has been written and published in its own book, with an accompanying disk.

The book contains:

- 274 Pages  
Covering everything from how to read sheet music to advanced SID applications
- Clear and Comprehensive Explanations  
With many examples and a description of a sample editing session to help you get started quickly

The disk includes:

- All the Programs Needed  
With versions for Commodore 128 on one side, Commodore 64/64C on the other
- Sample Songs  
Ready for you to examine or modify

The *Enhanced Sidplayer* Editor offers:

- Simple, Fast Note Entry  
By joystick or keyboard
- Easy Editing  
Like using a musical word processor
- Fast Operation  
The entire editor is written in machine language
- Powerful Functions  
From merging music with your own BASIC programs to putting music, words, and pictures together
- Countless Features  
Let you take the SID chip to its limits

*Sidplayer* is popular because it lets both novice users and more experienced musicians easily create songs of high quality. Over 6000 songs have been created for *Sidplayer*, which is a great testament to its ease-of-use. A freely-distributable song player program for *Enhanced Sidplayer* is also available, so you can share your *Enhanced Sidplayer* songs with other Commodore users.

To create your own *Sidplayer* songs, you need to get...

*Compute!'s Music System for the Commodore 128 and 64: The Enhanced Sidplayer*
